

We are at the evening of the 22.04.02 started from Tokyo and landed at the morning of the 22.05.02 on Hawaii. That is not an error, we exceeded the date line during the flight and we were allowed to have therefore the 22.04.02 twice.

First of all, we were on the island Kauai. Had there a very beautiful small house with kitchen etc. and a car with so much Automatic, that one could make wrong nothing at all. Our landlord people were very friendly and the weather mostly good. The car was, however, quite thirsty. Were repeatedly to the flat water diving at different beaches of the southern coast, where we lived too. The beaches were super, the corals, however, less. Fish were only few there.

Are driven up also to the Waimea Canyon and run there something around. Trekking was not for this trip planned. There were beautiful views and particularly many beautiful blooming trees and flowers.

A ride along the eastern coast to up to the northern top and to the so-called Na Pali coast we undertook too. There I wandered even along a small Trekkingtour.

After that we flew via Honolulu to Maui. Here there are very long beaches and also good snorkel possibilities. Also some turtles saw next to fishing. Unfortunately these swam quite deeply and about sandy soil, not about corals. That is not photographically good. The corals are not bad, but only hard corals. Saw already better one. The weather on Maui was increase so that it did not always absolutely move us into the water. The last days were even quite rainy. Hawaii is not an assurance for sunshine.

The 06.05.02 went us lost half. Inge had banged a jeep a little there while rolling back without visible damage. But the owner of the jeep believed to be able to mistreat a new plastic container for their windshield washer although this was calm at all near the contact points. So must first the police here, and that one was so slowly worldwide as all officials. Before we was provided ourselves it noon.

On 07.05.02 we were by PKW on the Halekalea-crater. Had quite luck, that we just still saw something before it again closed. Through the crater I did not run, the weather was done.

On 08.05.02 we are then further to Honolulu. Visited there a Hulashow. We do not do ourselves any illusions there, there more is not anything really. On Hawaii is nothing at all really. There is only another 1 % original inhabitants. However, if we already were there, we wanted to take along what approves the time. One can have seen most what to offer to Hawaii also elsewhere, and that for less money.

The visit of Pearl Harbor was very impressive. I am separated for this purpose something write. That comes into the aphorism file, under the title "Place of the madness".

The special one of Hawaii is the type of life. I do not have to describe that separately, it is the opposite of Prussian. Also the many flowers etc. are fabulous. The landscape and the rest are also very beautiful, however, not absolutely unique. In spite of that it fell to us well. Japan was however more interesting.
